

BRAYAN GÓMEZ

Full Stack Developer Medellín, Colombia | +57 301 3932979 |

gomezmancobrayanalexander@gmail.com | linkedin.com/in/brayan-gómez-7398771a4

SUMMARY

Full Stack Developer with 5+ years of experience building scalable web applications using Go (Golang), Angular, and React. Specialized in backend microservices, RESTful APIs, and leading frontend modernization projects, including high-impact migrations from Angular to React. Proven track record integrating robust payment systems, optimizing CI/CD pipelines, and deploying cloud-native environments via Azure and Docker. Passionate about clean architecture, performance optimization, and implementing SOLID principles to deliver measurable business value in Agile/Scrum environments.

EXPERIENCE

Full Stack Developer | Hibot Chat

May 2022 – April 2026

- **Frontend Modernization:** Led the architectural migration of core projects from Angular to React, improving application performance, maintainability, and component reusability.
- **Backend Architecture:** Designed and implemented highly scalable RESTful APIs and microservices using Go, adhering strictly to clean architecture principles to ensure decoupled and testable code.
- **Financial Integrations:** Spearheaded the integration of third-party payment gateways and designed a recurring payment system that automated billing workflows.
- **DevOps & Delivery:** Optimized CI/CD processes and automated cloud deployment workflows utilizing Azure DevOps and Docker-based environments.
- **Technical Leadership:** Collaborated actively in software architecture decisions, technical estimation sessions, and cross-functional Agile ceremonies.

Junior Developer | Hibot Chat

May 2021 – May 2022

- **Frontend Development:** Developed responsive web applications using Angular and managed complex application states efficiently with NgRx.
- **Backend & Automation:** Contributed to backend development using Go under hexagonal architecture frameworks and developed automated integrations and bots for WhatsApp, Facebook, Instagram, and Telegram.
- **Data Processing:** Worked with MongoDB and crafted advanced aggregation pipelines for high-performance data processing.

Freelance Full Stack Developer | Remote

2021 – 2022

- **Social Impact Platforms (Fundación ROFÉ):** Developed digital solutions for social impact initiatives, including the Mujeres ROFÉ platform supporting economic independence for women and the Jóvenes creaTivos system focused on workforce training. Managed production deployments using Microsoft Azure.
- **Enterprise Solutions (KIMSA):** Designed and developed administrative information systems for a climate change consulting firm, building backend services with NestJS and frontends with Angular and React.
- **Systems Integration:** Connected decoupled front-to-back systems through RESTful APIs and managed cloud deployments using Heroku and Hostinger.

SKILLS

- **Programming Languages:** Go (Golang), Java, TypeScript, JavaScript
- **Frontend:** Angular, React, NgRx, HTML, CSS, SASS
- **Backend & APIs:** Node.js, NestJS, Express.js, REST APIs, Microservices
- **Databases:** MongoDB, MySQL, Redis
- **Cloud & DevOps:** Azure DevOps, Docker, CI/CD, GitHub Actions
- **Architecture:** Clean Architecture, Hexagonal Architecture, SOLID
- **Tools & Agile:** Git, Agile/Scrum, Jira

EDUCATION

- **Software Development Technologist** – SENA (In Progress)
- **Software Development Training** – Sofka U (2021)
- **Software Development Technician** – SENA (2020)

CERTIFICATIONS

- **Advanced Go** – Platzi (2023)
- **Backend Development with Go** – Platzi (2023)
